

Copier et coller – Instructions pour la plateforme d'examen

Les candidats peuvent copier et coller dans les situations suivantes:

Le copier-coller peut être effectué

- à l'intérieur d'une même zone de réponse,
- d'une zone de réponse à une autre
- à partir des aides d'examen,
- de l'énoncé de la question, et/ou
- des documents de référence ou de contexte.

Deux méthodes:

1. Clic droit méthode 1 et méthode 2
2. Glisser et déposer

Méthodes qui peuvent être utilisées selon le scénario :

Copier & Coller	Méthodes qui peuvent être utilisées
A l'intérieur d'une même zone de réponse	• Méthode 1: clic droit
D'une zone de réponse à une autre	• Méthode 1: clic droit
A partir des aides à l'examen	• Méthode 2: clic droit
A partir de l'énoncé de la question	• Méthode 1: clic droit • Glisser et déposer
A partir des documents de référence ou de contexte	• Méthode 1: clic droit • Glisser et déposer

Méthode 1: clic droit

Lorsque vous copiez et collez du texte dans une zone de réponse ou entre différentes zones de réponse :

1. Sélectionnez le texte que vous souhaitez copier
2. Faites un clic droit et sélectionnez Copier
3. Faites un clic droit dans la zone de réponse et sélectionnez Coller

Une fenêtre apparaîtra comme suit 

Dans cette fenêtre, les candidats doivent faire un clic droit et déposer le texte copié dans la zone de texte et appuyer sur OK. Le texte copié apparaîtra à l'intérieur de la zone de saisie de la réponse

Coller 

En raison des paramètres de sécurité de votre navigateur, l'éditeur ne peut pas accéder directement aux données de votre presse-papiers. Vous devez les recoller dans cette fenêtre. Veuillez les coller dans le champ suivant à l'aide du clavier (Ctrl/Cmd+V) et valider.

Test Copier Coller 1

 

Méthode 2: clic droit

Lorsque vous copiez et collez à partir des aides à l'examen, des documents de référence ou de contexte et/ou de l'énoncé de la question dans une zone de réponse :

1. Sélectionnez le texte que vous souhaitez copier
 2. Appuyez sur « Ctrl +C / Cmd +C »,
 3. Revenez à la zone de réponse et cliquez à l'endroit souhaité.
- Faites un clic droit et sélectionnez Coller

Une fenêtre apparaîtra comme suit 

Dans cette fenêtre, les candidats doivent faire un clic droit et déposer le texte copié dans la zone de texte et appuyer sur OK. Le texte copié apparaîtra à l'intérieur de la zone de saisie de la réponse

Coller 

En raison des paramètres de sécurité de votre navigateur, l'éditeur ne peut pas accéder directement aux données de votre presse-papiers. Vous devez les recoller dans cette fenêtre. Veuillez les coller dans le champ suivant à l'aide du clavier (Ctrl/Cmd+V) et valider.

Test Copier Coller 1

 

Glisser et déposer

Cette méthode est utilisée lors de la copie de texte provenant des informations de contexte ou de la question vers une zone de réponse :

Sélectionnez le texte que vous souhaitez copier et faites-le glisser dans la boîte de réponse.

stirrer 10 encloses the flared portion 94 proximate to the base of the conical body 84. Below the stirrer 10, a scraping surface is defined at the intersection of an outwardly facing vertical surface and an inwardly facing sloped surface.

[15] The second embodiment of the ice scraper 100 conveniently provides the user with two options for cleaning a surface. With the first option, the user can press fit the cap 54 into the conical body 56, place the open bottom portion 60 against the surface to be cleaned, apply pressure directly to the surface, and drive the ice scraper 100 in any direction on the surface to remove debris, ice, frost, or snow. With the second option, the user can remove the cap 54 from the conical body 56 in order to use the cap 54 alone to clean a surface. The user can easily grasp the domed handle 90 of the cap 54 in the palm of the user's hand, place the scraping surface 80 against the surface to be cleaned, apply pressure directly to the surface, and drive the cap 54 in any direction on the surface to remove debris, ice, frost, or snow.

CLAIMS:

1. An ice scraper for a windshield comprising:
a hollow conical body having an open top portion and an open bottom portion, the open top portion being of a smaller diameter than the open bottom portion, the open bottom portion having a scraping edge formed thereon extending around the periphery thereof; and
a cap having an upper portion and a lower portion, a neck extending from the upper portion of the cap, the neck being releasably secured to the open top portion of the hollow conical body.

1. wherein the scraping edge is formed by an outwardly facing surface and an inwardly facing surface; and
2. wherein the upper portion of the cap is of a larger diameter than that of the open top portion of the hollow conical body.

4. An ice scraper for a windshield comprising:
a first hollow conical body having an open top portion and an open bottom portion, the open top portion being of a smaller diameter than the open bottom portion, the open bottom portion having a scraping edge formed thereon extending around the periphery thereof; and the first hollow conical body further being constructed of a pliable material so that the scraping edge readily conforms to curvatures in the windshield; and
a cap shaped as a second hollow conical body, the cap having a top portion and a bottom portion, a neck extending from the top portion of the cap, the neck being releasably secured to the open top portion of the hollow conical body, the top portion of the cap being of a larger diameter than that of the open top portion of the hollow conical body, the bottom portion of the cap being dome-shaped.

Question Score: 20

3 Question 4 [20 marks in total]

You have received an Office Action for Canadian Patent Application CA1,234,567. The Examiner has rejected claim 1 as anticipated by reference D1. The Examiner has rejected claim 2 as obvious in view of D1 and further in view of D2. The Examiner has rejected claim 3 as dependent on claim 1. The Examiner has rejected claim 4 as indefinite. The Applicant does not think that D1 and D2 are similar to their product and wants you to amend the claims. Amend the claims of CA 567, in light of references D1 and D2, as follows:

(a) amend the claims to address the novelty of claim 1 in view of reference D1; [14 marks]
(b) amend claim 2 to address obviousness of claim 2 in view of references D1 and D2; [4 marks]
(c) amend claim 4 to address indefiniteness/clarity. (Note: Use strikethrough to identify text that is being redacted, and use underline to identify text that is being added.)

For easy editing, select the text you want to amend, and drag and drop it into the top left corner of the response box.) [2 marks]
